

- In this module, we offer a model of collaboration that consists of a series of steps that provides a guideline on how to work together with the migrant landowners. This research-based model shows the more participative and collaborative the relationship is between staff and clients, the higher the odds of program success (e.g., conservation programs).
 - The main objective is to provide NRCS staff with skills in developing collaborative partnerships and relationships with the new ex-urban landowners.
-
- Wrap-Up Discussion and Evaluation

1 GEN CEU will be offered
Catered lunch is included
